

Key Message

Tableau is an **intuitive, easy to use point-and-click** driven tool for **data wrangling** and **visualisation**, with the ability to easily create **interactive charts** and build **complex dashboards**.

Tableau Public is a **free to use** desktop application allowing users to use the **Tableau interface** to create **interactive charts** and **dashboards** for sharing **publically online** to the **Tableau Public cloud-based service**.

Tableau Public **does not have access to the desktop file system**, only allowing files to be **saved to the Tableau Public cloud**.

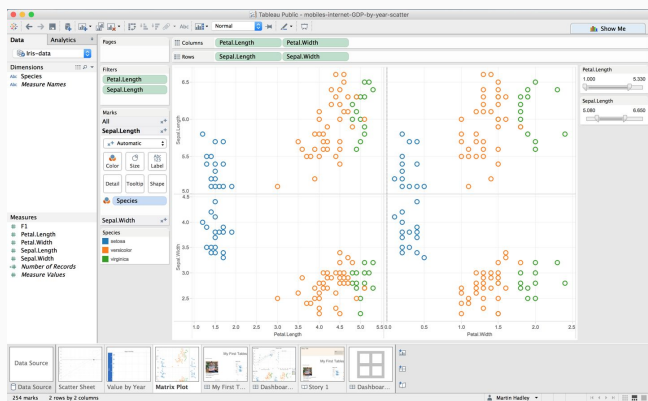

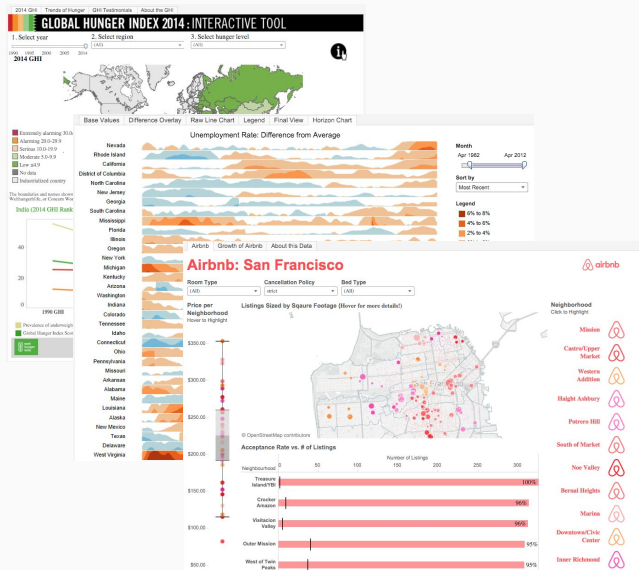

Creating Interactive Data Visualisations with Tableau Public

Martin John Hadley

Academic Research Technology Specialist

IT Services

Why Tableau?

For a Gantt view try
 1 date
 1 or more dimensions
 0 to 2 measures

Intuitive and Easy-to-use Interface

Easily import data from .xls, .xlsx, .csv files or directly connect to MySQL, SAP or even Hadoop clusters...

Prepare, filter and analyse data with a powerful point-and-click interface

Automated design of visual presentation

“Data science at the speed of thought”

In a file

- ☐ Other Databases (ODBC)

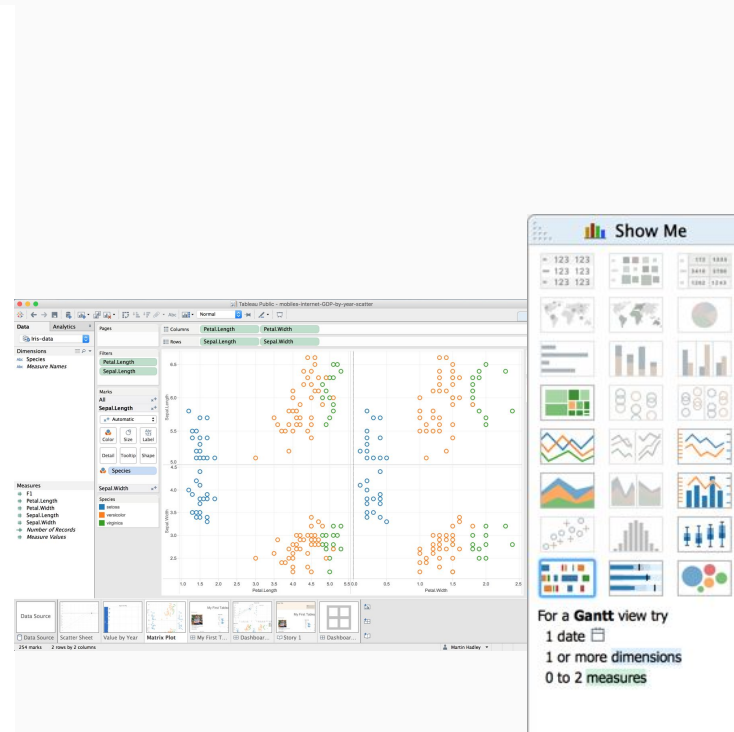

Tableau Dashboards

Combine multiple interactive charts to communicate multiple dimensional datasets

Add text and imagery to charts to add narrative to your data visualisations

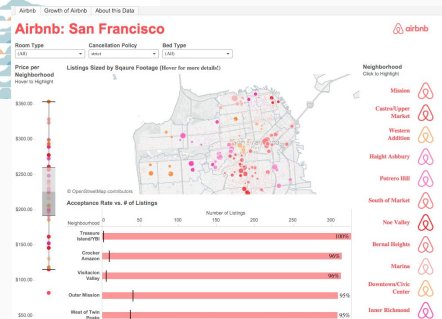

Tableau Stories

Provide further narrative for your data by combining multiple dashboards to create a Tableau Story

Boris bike availability during the recent London tube strike

Apparently this is a better position (approx 1.5 mile drive from Charing Cross). I used this to fine Central vs Outer London.	Did commuters just take them home? Looks like it!	Compared to weekday averages (data gathered over previous year), bike availability in and out of London saw a sharp drop during the strike.	Here's the typical distribution of bikes at 7pm on a given day - this was the Monday before the strike began.	24 hours later, after the strike had just started, availability in central London was down 10% as commuters used the bikes to get home.	By 1am there were basically no bikes available in central London, with commuters leaving many at the outer stations.	Commuter use of bikes to get home, is in town height of
---	---	---	---	---	--	---

Availability by bike station

Stations without any bikes available are not shown

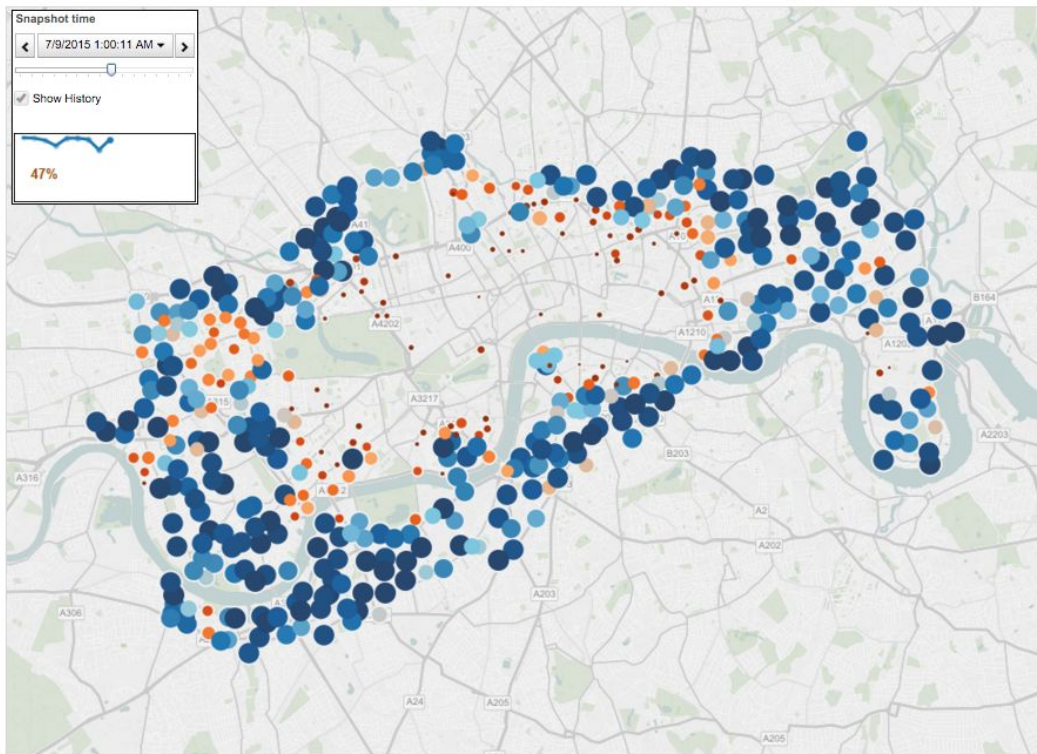

Tableau Desktop, Tableau Mobile,
Tableau Public, Tableau Reader
and Tableau Server...

Dragons live below this slide...

Get Data:

Countries:

UK, France, Germany
United States, Canada
China, Japan

Metrics to Take:

Mobile phones, GDP, articles
published, borrowers

Years:

1995 - 2014

```
CASE [Country.Name]
  WHEN "United Kingdom" THEN "Europe"
  WHEN "France" THEN "Europe"
  WHEN "Germany" THEN "Europe"
  WHEN "United States" THEN "North America"
  WHEN "Canada" THEN "North America"
  WHEN "Egypt" THEN "Middle East"
  WHEN "China" THEN "Asia"
  WHEN "Japan" THEN "Asia"
  ELSE "OTHER"
END
```

FIRST DASHBOARD

Simple worm chart

a. Show pages for it

2. Might be interesting to look at the year of the financial crash in 2008

3. To do that make a subset of the Year Dimension

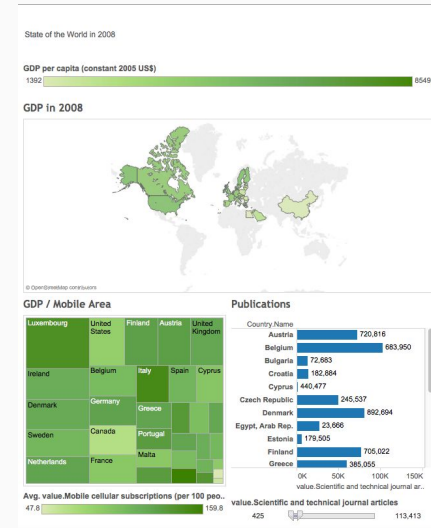

4. Make a world map for the year of the financial crash

5. Rectangle area chart with GDP and mobile use

6. Bar Chart of publications

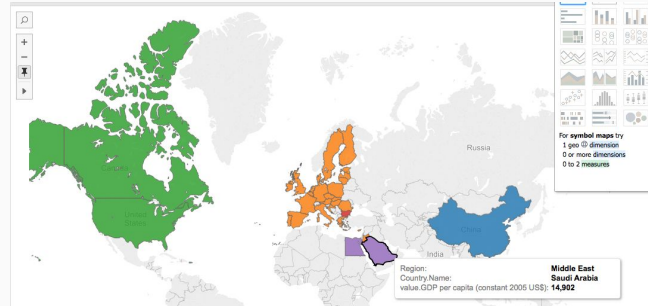

7. Make into a dashboard

8. Add a quick filter to the Publications

Regions and Parameters

1. Duplicate the world map
2. Create a calculated field called region
3. Add information to the tooltip
4. Duplicate Area and Publications
5. Duplicate dashboard
6. Wouldn't it be nice to be able to switch between regions and countries?
7. Create a Parameter
8. Create a calculated field based on the parameter
9. Add this to the worksheets

```
CASE [Country.Name]
  WHEN "United Kingdom" THEN
    "Europe"
  WHEN "France" THEN "Europe"
  WHEN "Germany" THEN
    "Europe"
  WHEN "United States" THEN
    "North America"
  WHEN "Canada" THEN "North
    America"
  WHEN "Egypt" THEN "Middle
    East"
  WHEN "China" THEN "Asia"
  WHEN "Japan" THEN "Asia"
  ELSE "OTHER"
END
```

Story

1. Combine into a story!
2. Upload!

1995 - 2014

State of the World in 2008

Region GDP in 2008

Region

- Asia
- Europe
- Middle East
- North America
- OTHER
